

The best place for ink is on your banners!

Downtown Decorations banners are imaged with heat-set UV-stabilized inks that are bonded to the fabric during the printing process. Once the banners are complete, the ink poses little to no environmental hazard. However, in its soluble state, these inks are costly to properly discard. To this end the company has worked with U.S. ink manufacturers to develop a line of standard ink colors that resist fading and comply with the company's warranty and corporate eco-statement.

We encourage ink colors to be chosen from the selection on this page. These inks can be used for your project and the excess can be returned to the master ink bucket for future usage, hence we can mutually eliminate waste and the safe handling costs of soluble disposal.

Realizing that this is not possible for many of our clients we gladly prepare any custom color match, however your specific color may not be needed by others and a small amount may need to be discarded. Because we want to ensure that non-toxic UV-stabilized pigmentation is used for your product and to safely dispose of the excess ink, it is necessary to charge an additional fee.

Thanks for your understanding and cooperation.

DD Standard UV Sensitive Colors: Red/Yellows/Pinks & Purples Custom PMS with UV stabilizers are available at additional cost of \$350 per colors

	PMS 115c Lemon Yellow
	PMS 123c Yellow
